Built for the borderline.

In a race full of extreme manoeuvres, in which elite pilots steer their quick, agile racing planes just a few metres above the ground through narrow air gates, exposing themselves at forces of up to 12G as they do so, mere fractions of a second determine who wins or loses. One of the world's best pilots, Matthias Dolderer is to take on the biggest challenge between heaven and earth – the Red Bull Air Race World Championship 2009, the most breathtaking motorsport series in the world. Obviously, in doing so Matthias Dolderer will be placing his trust in a watch that only really comes into its element under the most severe G-forces and violent turbulences: the new Gravity Defier GW-2000, the solar-powered, radio-controlled aviator watch from G-SHOCK.

Time for your declaration of independence.

With Multiband 5 radio signal reception. >>>

Whether on an Airboard or in an airliner: when you're regularly on the move between heaven and earth, you've got more things to worry about than resetting the time. Solar-powered, analogue-digital, radio-controlled watches from G-SHOCK are therefore the perfect companion for frequent flyers: their radio signal receivers decode the time signals beamed out via radio towers from atomic clocks in Europe, North America and Japan and always display the accurate time, down to the split second. Fully in keeping with your completely independent attitude.

- Multiband 5 radio signal reception (EU, USA, Japan)
- Tough Solar
- World time + stopwatch
- Countdown timer
- Alarm
- Water-resistant up to 20 bar

FOR THOSE WHO NEED TO SHIFT INTO A HIGHER GEAR.

An estimated 42-degree slope, loose boulders, scorching heat and still at least 200 metres more until you reach the peak – in mountain biking, it's moments like these that separate the amateurs from the professionals. And it's for exactly such situations that the Riseman GW-9200 has been developed: concealed inside its completely impact- and shock-proof case are innovative technological features such as an altimeter, thermometer, barometer and Multiband 6 radio signal receiver for all those who want to ride that long way to the top.

- Multiband 6 radio signal reception (EU, USA, Japan, China)
- Tough Solar
- Altimeter
- Barometer
- Thermometer
- <FULL-AUTO-ILLUMINATOR>
- 5 alarms
- Water-resistant up to 20 bar

SQUARED FREESTYLE.

Behind you, half a dozen leaps over urban canyons, four slides down steep stair rails, two bruises and a pretty fearsome guard dog. Ahead of you, a vertical house wall - and the great feeling that, tonight, the city belongs to you. If someone asks you what time it is while you're out and about, just glance at the stylish display of your G-7800. And should anyone ask you where you're heading, just answer: 'Wherever I want!' Because at the end of the day, in parkour that's the only destination.

- <AUTO-ILLUMINATOR> • LED indicator (Display Flasher)
- World time + stopwatch • Repeat countdown timer
- 8 preset timers • 5 alarms • Water-resistant up to 20 bar

FOR WHEN THE SURF GETS SERIOUS.

High waves, treacherous currents and a race against time: for lifeguards, every call-out is a battle against nature's forces. With their signal red rescue look, the G-9000 and G-9100 have been designed especially for such extreme conditions: water-resistant up to 20 bar, equipped with features such as world time, a stopwatch, multi-alarm, tide graph display** - and completely indestructible.

IT'S BOARDING TIME.

Fox grind, freakout, 50-50 - while they won't mean a thing to most people, all true skaters will immediately know what the time has come for. Because since the beginning of the 1980s, not only has skateboarding been an extremely demanding sport, it's also developed into an urban subculture that defines itself through its own language, music and fashion. G-SHOCK has formed part of this 'street culture' since the beginning - after all, the legendary, robust case of a G-SHOCK can survive even the hardest of falls. With their retro design, the new vintage models bring to mind the early 1980s - a time in which skateboarding and G-SHOCK got rolling together.
